PSY.D IN SCHOOL PSYCHOLOGY

Department Website: Psy.D in School Psychology (https://www.gonzaga.edu/school-of-education/graduate/psyd-school-psychology/)

The Doctorate in School Psychology (Psy.D.) aims to prepare graduate candidates to become licensed school psychologists in the state of Washington. Graduate preparation in school psychology educates and trains individuals to apply principles in psychology and education (e.g., child development, learning theory, evaluation) to support school-wide academic and social-emotional programs, collaborate with teams to identify learning and behavior problems, and develop evidence-based intervention plans. Doctoral-level school psychologists are credentialed by state agencies to work in a variety of settings including, but not limited to, PreK-12 schools, hospitals, residential facilities, and higher education. In Washington State, doctoral-level school psychologists obtain a license to practice through the Department of Health.

Psy.D in School Psychology: Post-Baccalaureate

Post-baccalaureate Psy.D. candidates would attend courses with the Ed.S. candidates for the first two years and then separate in year three. That is, the Psy.D. candidates would continue with their doctoral-level preparation and the Ed.S. candidates would begin internship.
